

EPHEMEROS FOR

Urban Growth

Watch neighbourhoods and skylines rise, one aligned photo at a time.

Scan to see how it works

Repeat photos of fixed viewpoints, aligned by the free Ephemeros app, become timelapses — a shared, lasting record of how places change.

1

Scan the code

See examples, and grab the free app for Android.

2

Line up the ghost

The previous photo floats over your camera — match it and shoot.

3

Watch it change

Every aligned photo extends the timelapse, for years to come.
